

# BLUME'S<sup>®</sup>

## Corian<sup>®</sup> Care & Maintenance

### Countertops

#### Cleaning:

##### **Most Dirt & Stains:**

Use soapy water or an ammonia based cleaner (not window cleaner), rinse and wipe completely dry.

##### **Preventing Water Marks:**

Rinse and wipe completely dry after cleaning; clean up spills before they dry.

##### **Removing Hard Water Marks:**

Use a cleaner formulated for removing hard water marks, such as CLR or Lime-A-Way.

#### Difficult Residue:

Spray residue with Deep Cleaner for DuPont™ Corian® from Stone Care International. Follow instructions on the bottle. Wash area with soapy water, rinse and wipe completely dry. If residue persists, repeat process.

#### Disinfecting:

Occasionally wipe surface with diluted household bleach (1 part water/1 part bleach). Rinse thoroughly with water and wipe completely dry.

### Sinks

#### Cleaning:

Use soapy water or an ammonia based cleaner (not window cleaner), rinse and wipe completely dry. Use Soft Scrub® and a green Scotch-Brite® pad to remove residue. Rub green Scotch-Brite® pad over entire sink to blend in finish.

*Do not use Scotch-Brite® pad on countertop surface as this will dull the surface!*

#### Disinfecting:

Fill your sink ¼ full with diluted household bleach (1 part water/1 part bleach). Be sure to get some of the solution into the overflow opening to disinfect. Let the solution stay in the sink for 15 minutes; then wash sides and bottom as solution drains. Rinse out the sink with water.
